## MANAGEMENT DISCUSSION AND ANALYSIS

Following the successful implementation of restructuring and development initiatives including the disposal of the manufacturing and trading business at the end of 2008, the Group is now focusing on three synergistic core businesses with quality assets and operations, namely real estate development and project management, specialised construction and property investment.

During the six months ended 30 June 2009, the Group recorded consolidated revenue of HK\$378.1 million, representing an increase of 285.6% over the comparative figure of HK\$98.0 million for the corresponding period last year. This significant increase was mainly attributable to the revenue recognised in the real estate development operations and the additional rental contribution from the China Minmetals Tower acquired in August 2008.

Profit attributable to equity holders of the Company increased by 50.8% to HK\$41.0 million for the six months ended 30 June 2009 (30 June 2008: HK\$27.2 million). Excluding revaluation gain on investment properties of HK\$20.0 million (30 June 2008: HK\$15.0 million), profit attributable to equity holders of the Company during the period under review was HK\$21.0 million as compared to HK\$12.2 million for the same period last year.

In August 2008, the Group acquired the China Minmetals Tower from its controlling shareholder and as consideration, issued 340,000,000 new shares. On 30 June 2009, the Company completed a rights issue on the basis of one rights share for every two shares (the "Rights Issue"). As a result of these two transactions, the shares in issue increased from 773,831,783 shares as at 30 June 2008 to 1,113,831,783 shares as at 31 December 2008, and to 1,670,747,674 shares as at 30 June 2009. Despite the substantial expansion of the share capital of the Company, basic earnings per share for the six months ended 30 June 2009 for the continuing operations increased by 16.1% year-on-year to HK3.67 cents (30 June 2008: HK3.16 cents).

Following the issue of new shares during the 12 months ended 30 June 2009, the financial position of the Group, particularly in terms of total assets and total equity, has been considerably enhanced. As at 30 June 2009, total assets and total equity of the Group amounted to HK\$4,525.4 million (30 June 2008: HK\$3,157.2 million) and HK\$2,372.8 million (30 June 2008: HK\$1,136.4 million), respectively. Furthermore, on 4 September 2009, the acquisition of the entire equity interest in Luck Achieve Limited by the Group was concluded and has resulted in the addition to the Group's assets of approximately 230 million ordinary shares in Hong Kong-listed Franshion Properties (China) Limited (stock code: 817.HK) as well as approximately HK\$172.0 million in cash.

The board of Directors has resolved not to declare an interim dividend for the six months ended 30 June 2009 (30 June 2008: Nil).

The table below sets out total revenue and segment results of the Group by business segment with respect to the continuing operations for the six months ended 30 June 2009, together with the comparative figures for the corresponding period last year:

#### REAL ESTATE DEVELOPMENT AND PROJECT MANAGEMENT

The Group completed the sale of residential and commercial units of The Grand Panorama Project in Zhuhai, Guangdong Province, the PRC, in 2008 with only several car parking spaces remaining available for sale as at 30 June 2009. For the six months ended 30 June 2009, the Group was undertaking three real estate development projects in two cities in the PRC.

Location	Project	<b>Interest of the Group</b>
Nanjing City,	Laguna Bay Project	71.00%
Jiangsu Province	Riveria Royale Project	50.89%
Changsha City, Hunan Province	LOHAS International Community Project	51.00%

During the six months ended 30 June 2009, segment revenue of HK\$273.6 million was generated from the sale of the Laguna Bay Project and the car parking spaces of The Grand Panorama Project, and no revenue was generated by the Group from project management activities. The revenue of HK\$0.6 million in the corresponding period last year was, however, generated entirely from the remaining balance of the service fees from a project management service contract. This business segment achieved a profit of HK\$13.8 million against a loss of HK\$18.4 million in the previous period last year.

## Laguna Bay Project

This three-phased residential development project is located in Jiangning District in Nanjing City of Jiangsu Province of the PRC with a total gross saleable floor area of approximately 262,000 square metres. The Group has a 71% interest in the Laguna Bay project.

Construction of Phase I of this project was completed in the first half of the year with more than 98% of the units pre-sold up to mid-September 2009. Most of the units pre-sold before 30 June 2009 were handed over to buyers during the period under review and hence the corresponding sale proceeds were recognised as revenue of the Group. Based on the satisfactory pre-sale results subsequent to 30 June 2009, the Group expects to recognise substantially all the sale proceeds from Phase I within the year 2009.

The pre-sale of the Phase II low-rise residential units and villas will commence in the fourth quarter of this year, while handover of the property units is expected to take place from December 2009. The construction work and pre-sale of Phase III are scheduled to start before the end of 2009 and in 2010 respectively.

## LOHAS International Community Project

This six-phased residential development project is located in Changsha City in Hunan Province of the PRC with a total gross saleable floor area of approximately 1.0 million square metres. The Group has a 51% interest in the LOHAS International Community project.

Following the completion of the central commercial complex comprising residents' clubhouse and shops, pre-sale of part I of Phase I was officially launched in early September this year. Thus far, pre-sale results have been encouraging. Up to mid-September 2009, more than 140 residential units out of the 296 units allocated for pre-sale were contracted for sale, and these pre-sold units are expected to be handed over to buyers in stages commencing December 2009.

The construction work of part II of Phase I is under way and pre-sale is expected to be launched before the end of 2009.

## Riveria Royale Project

This residential development project is located in Jianye District in the Nanjing City of Jiangsu Province of the PRC with a total gross saleable floor area of approximately 173,000 square metres. The Group has a 50.89% interest in the Riveria Royale project.

The project comprises condominium units and villas with a complex of shops and restaurants. During the period under review, site formation work had been completed. It is expected that the relevant permit for construction will be obtained imminently from the government authorities in the PRC and the construction work will commence in the fourth quarter of 2009. Pre-sale of the project is scheduled to be launched in the first quarter of 2010.

#### SPECIALISED CONSTRUCTION

The Group has been carrying out the specialised construction business in the form of design and installation of curtain walls through SJQ in the PRC and through Condo HK in Hong Kong and Macau. Both SJQ and Condo HK are wholly-owned subsidiaries of the Group.

## SJQ

SJQ recorded revenue of HK\$68.9 million from external sales for the period under review as compared to the comparative figure of HK\$68.6 million in the corresponding period last year. Segment profit was HK\$3.5 million, up from HK\$0.04 million for the six months ended 30 June 2008. SJQ secured new contracts of a total amount of HK\$136.8 million in the first half of 2009. As at 30 June 2009, outstanding contracts on hand amounted to HK\$159.6 million (30 June 2008: HK\$163.9 million).

## Condo HK

During the period ended 30 June 2009, Condo HK's revenue from external sales amounted to HK\$12.0 million as compared to the comparative figure of HK\$18.5 million in the corresponding period last year. Segment profit was HK\$0.9 million as compared to HK\$1.2 million for the same period in the preceding year. As at 30 June 2009, Condo HK's outstanding contracts on hand, including the Tamar Development Project, amounted to HK\$24.2 million (30 June 2008: HK\$43.7 million).

#### PROPERTY INVESTMENT

During the period under review, the property investment business primarily encompassed the leasing of office and commercial space of the ONFEM Tower and the China Minmetals Tower.

Revenue from this business segment increased by 124.7% year-on-year to HK\$23.4 million for the period under review (30 June 2008: HK\$10.4 million), mainly due to the additional rental contribution from the China Minmetals Tower since the third quarter of 2008. In the first half of 2009, the office acquisition market in Hong Kong was active, fuelled by the low interest rate environment. Buoyant conditions were evidenced by the revaluation gain on investment properties recorded by the Group of HK\$20.0 million during the period under review (30 June 2008: HK\$15.0 million). On the other hand, office rent in core areas such as the Central District generally faced downward pressure, as office space surrendered by companies had yet to be fully taken up. As such, rental rates of renewed leases in both the ONFEM Tower and the China Minmetals Tower during the first half of 2009 were slightly lower as compared to the rates achieved at the end of 2008. Nevertheless, according to market reports published by leading property valuers in Hong Kong, the downward pressure on office rents in core areas in Hong Kong may ease in the short-term as many companies may have already completed their downsizing. Excluding revaluation gain, segment profit was HK\$21.2 million for the six months ended 30 June 2009, up 133.0% from HK\$9.1 million in the corresponding period last year.

ONFEM Tower is a 25-storey commercial building located in the Central District on the Hong Kong Island. Occupancy rate was 88% as at 30 June 2009 (31 December 2008: 86%). China Minmetals Tower is a 20-storey office and commercial building located in Tsimshatsui in Kowloon. As at 30 June 2009, the occupancy rate for office and commercial spaces were 90% and 59% respectively (31 December 2008: 92% and 59%).

## **OUTLOOK**

In the first half of 2009, while the global economy was still being affected by the global financial crisis, improvement in the economic situation in the PRC became apparent after implementation of a series of economic stimulus policies. In the PRC and in particular since the second quarter of 2009, the government had introduced a RMB4 trillion stimulus plan by increasing credit and liquidity in the market primarily to boost domestic demand. At least partially driven by such stimulus policies, a substantial pick-up in latent demand was seen as evidenced by the rebound in the PRC real estate market in terms of transaction volumes and prices in recent months.

Facing the unexpected change in market fundamentals as described above, the Group promptly adapted to more positive market conditions. Captialising on the experience of our dedicated management team and leveraging on the strong brand name of China Minmetals Corporation, our controlling shareholder, the Group continued to focus on using effective and pertinent marketing strategies for its real estate development business to achieve satisfactory results. Furthermore, with strong support from China Minmetals Corporation, the Group was able to complete a series of acquisitions and fund-raising activities, thereby enhancing our asset base and position the Group for future growth and expansion.

At present, whilst the economic situation in the PRC appears to be in the process of stabilising with some early signs of recovery, there is still uncertainty as to whether or not the recovery will be sustainable. The current rebound in the PRC real estate market is likely to have been induced by low interest rates, abundant liquidity and medium-term inflationary expectations all contributing to a one-time release of latent demand. Similarly, it is uncertain as to whether and how the PRC government's fine-tuning policies in the near future might impact on the real estate sector in light of the uncertain economic recovery. Nevertheless, given the PRC government's reiteration that the "appropriately relaxed" monetary policy will continue in the short-run, the Group is optimistic about the medium to long-term prospects of the property market in the PRC and will pay close attention to the potential influence of changes in macro economic policies.

In order to continue and sustain business growth, the Group will continue to adopt a "proactive, prudent and appropriately focused" principle of investment in its real estate development business. More specifically, the

Group will continue to identify and pursue quality real estate development projects in the PRC in first-tier cities (such as Beijing, Shanghai and Tianjin) and core second-tier cities (such as Changsha and Nanjing). Projects which are determined to be attractive after rigorous feasibility and risk assessment will be pursued through various means such as public auction and private acquisition so that the Group's real estate project portfolio will maintain its healthy growth.

Looking ahead, the Group considers that the prospects for the real estate market in the PRC to be favourable and believes that, with the support of our controlling shareholder and the efforts of our management to enhance our business management capabilities, product quality, brand value and ability to innovate, we will be able to achieve satisfactory results and continue to enhance shareholders value.

# EXPOSURE TO FLUCTUATION IN EXCHANGE RATES

The Group is exposed to exchange rate risk on transactions that are denominated in a currency other than Hong Kong dollars, the functional currency of the Group. During the period under review, most of the transactions of the Group were denominated in Hong Kong dollars and Renminbi. As such, the Group has exposure to exchange rate movements between Hong Kong dollars and Renminbi. Given that the expected continuing strength of the Renminbi would have a positive impact, in Hong Kong dollar terms, on the Group's assets in and income generated from the PRC, the Group had not implemented any hedging or other alternative measures during the six months ended 30 June 2009 but is closely monitoring the aforesaid exchange risks.
